

FACULTY: THINGS TO KNOW

Grants

You will be able to access information regarding your direct reports, including salary and benefits, 24/7.

Hiring

In order to facilitate email and netID to be available on day 1, new hire paperwork will need to be started earlier to have time for approval processes. (Ideally two weeks or more before start date).

Leave Reporting

Leave for most postdocs, etc. can be approved online by someone in the division who has an approver role.

Personal Benefits

You can directly update your personal profile (ex. birth of a baby, etc.) and enroll in benefits directly through UCPATH.

Reporting

There will be new reports available to address key areas of interest to faculty.

FAU

You will be able to work with Finance to initiate changes of the FAU that pays your postdoc, tech, etc.

Sabbaticals

Instead of asking Dean's staff, you can check your sabbatical accrual online.

Banks

New system will allow you to use up to three banks direct deposit of your paycheck.

OTHER IMPACTS:

- Processing of some complex transactions will take longer since they will go through UCI approval process before routing to UCPATH Center.
- Supervisors will have less time to approve timesheets of readers/tutors/non-exempt academics who are paid bi-weekly.
- It is not possible to have a postdoc get paid at a normal time without first having someone process the hire.
- UCPATH will not end a position when a fund expires.
- The current degree of flexibility to cut a check will not be available.
